

Homemade Paint

Please remember to always supervise children at all times.

What you will need:

- ✓ mixing bowl
- ✓ measuring cup
- ✓ flour
- ✓ salt
- ✓ food coloring
- ✓ water
- ✓ a funnel
- ✓ container for paint

Directions:

1. In a mixing bowl, combine even parts of water, salt, and flour. I normally do 1 cup of water, 1 cup of salt, and 1 cup of flour.
2. Once fully combined, funnel the mixture into containers with a lid.
3. Place small drops of food coloring in each container.
4. Shake the bottles to mix the paint.
5. Continue adding food coloring until desired shade is achieved.
6. Paint as usual! Paint will completely dry on paper.
7. Store the paint with the lids on top.
8. Paint will separate after sitting for awhile. Simple shake the bottles up again and they will be as good as new!
