Homemade Play-dough

Please remember to always supervise children at all times.

What you will need:

- 8 tbsp plain flour
- 2 tbsp table salt
- 1 tbsp cooking oil
- 55 ml hot water
- food coloring
- 1 tbsp cream of tartar (you can replace this with a squeeze of lemon juice if you don’t have it)

Directions:

1. Combine flour, salt and cream of tartar (if using lemon juice put in step 2 bowl) in a large mixing bowl and mix.
2. In a separate bowl combined cooking oil and hot water (squeeze of lemon if not using cream of tartar).
3. Pour the combined liquids in with you flour and salt mixture. Use a spoon or your hands to mix.
4. Next, add your food coloring. The more drops you add, the darker your color will get.
5. Mix for a minute or so and transfer it onto a flour-dusted surface.
6. Now you have to knead it for a few minutes. Continue kneading until your are happy with the play-dough consistency.
7. If it is a little sticky still, add some more flour, lightly dusting until you reach desired consistency. If it seems too dry, wipe it with a little water. Don’t add too much though as a little goes a long way.
8. Now your play-dough is ready to use!
